

FOR IMMEDIATE RELEASE 2.21.2013

SATU 90' – First of a New Class

Satu Marine's release of the first Superyacht Sportfish at the 2013 Miami Yacht & Brokerage Show confirmed that Satu is truly "the first of a new class of Sportfish."

Rave reviews and acclaims she gathered from customers throughout the show even brought over Bill Blount of Donald L Blount & Associates, John Bayliss of Bayliss Boatworks, Alton Herndon, President of Bertram Yachts along with top management of The Ferretti Group, and Pat Healy, Executive VP of Viking.

One comment was, "Satu 90 really is a stunning Superyacht in a spectacular Sportfish shell!"

Rick Newhauser, Satu Marine, enthusiastically stated, "Our vision was to create a high performance Sportfish Yacht combined with the luxury and attention to detail of a World Class Superyacht. I am ecstatic that everyone gets it!"

Elite designers, engineers, big game anglers, and equipment manufacturers assembled to design this first Superyacht Sportfish. Yachting Developments, a builder with multiple Superyacht of the Year awards, delivered the attention to detail to make Satu 90' a Superyacht Sportfish.

Beneath her beautiful lines and classic styling, Satu 90' has speed, range, maneuverability to turn on a dime, and the power to back down fast when needed. She has top end speed in excess of 33 knots, and will cruise

effortlessly at 30 knots. With over 2600 nautical mile range, she is designed to access in comfort remote untapped international fishing grounds. Her high speed planing hull provides smooth, fast, dry travel.

Satu 90 is magnificently powered by two 16V 2400hp MTU engines. Two 58K CAT Generators provide plenty of redundant power to drive all systems. Heinen & Hopman designed and built state-of-the-art refrigeration and mechanical systems to handle the most extreme conditions.

All systems on board are superyacht quality, and most are redundant to ensure uninterrupted performance and safety. World class sound design provides personal comfort whether travelling the high seas or on the hook in a remote bay.

Open flybridge design provides excellent visibility as well as comfortable space for outdoor dining and relaxing. The heart of the flybridge helm is SAM Electronics top-of-the-line Integrated Navigation and Command System and MTU Integrated Ship Monitoring Systems. Data is displayed on three 19-inch Hatteland Monitors with custom control panels.

World Class Anglers designed the cockpit. The International Fighting Chair articulating pedestal provides rod tip clearance while fighting a world record marlin, and the transom door is large enough to bring in a “grander.” Unrivalled visibility of both water and cockpit, plus all major systems to operate Satu are at your fingertips. The tower was expertly designed, manufactured and built by Bausch American Towers to enhance the ultimate fishing experience.

Timber of a single Japanese Ash tree defines the elegant yet clean and contemporary interior. The galley has a spacious open design with a perfectly seamless, single-piece brushed stainless countertop. Four cabins

are light, spacious, quiet retreats. Beautiful timbers, natural fabrics, and open design invite you in. Attention to the finest detail is the emerging theme in the Satu 90.

Satu 90 will be waiting for you in Slip 121 at the Palm Beach International Boat Show. She will be shown by MacGregor Yachts, Inc.

She can also be seen at the following YouTube link:

Satu 90 Specifications:

Designer	Ullberg Yacht Design & Engineering	
LOA	90.0ft	27.43m
LWL	82.1ft	25.03m
Beam	23.0ft	7.01m
Draft	5.5 ft	1.51m
Displacement (50% load)	164,000 lbs	73,374 kg
Fuel	4500 US gal	17,034 liters
Water	750 US gal	2,839 liters
Propulsion	2 x MTU 16V-2000CR 2400bhp @ 2450rpm	
Generators	2 x Caterpillar C4.4 58kw/67.5 kva	
Construction Type	Composite	

Design Max Speed	33 knots
Cruise Speed	30 knots
Range	2600 nautical miles
Project Management	Walker Projects
Hull Structure	SP Systems
Interior	Robinson Marine Interiors + Owner
Builder	Yachting Developments

Satu 90 Team of world class Designers, Engineers, Builders and Suppliers
